Hein Molenkamp

Managing Director Water Alliance

Hein Molenkamp is Managing Director of the Dutch Water Technology network organization Water Alliance.

Hein is 56 years old and has gathered many years of business experience in several international oriented companies in various sales & marketing functions. Especially in the field of product development and market introduction in an international setting he has gained expertise bringing innovations to the market. Those experiences fit perfectly in his current position at Water Alliance. Previous Hein has worked almost ten years as product manager at Paques in Balk, The Netherlands, and some years at Grundfos Biobooster A/S, Denmark. Hein started his career in the agriculture sector, working with several manufacturers of agricultural equipment, like Douven (today part of John Deere Corp) and Vicon. Also he was involved in the early development stage of the milking robot at Gascoinge Melotte.

See his linked-in profile for more information: <https://nl.linkedin.com/in/hein-molenkamp-b546856>

The Water Alliance is a unique partnership of public and private companies, government agencies and knowledge institutes involved in Water Technology in the Netherlands. The Water Alliance, based at WaterCampus Leeuwarden, focuses on innovative and sustainable Water Technology that can be used worldwide. It brings together a complete chain of innovation for Water Technology, from first ideas, research & development, specialized laboratories, a Water Application Center, various demo-sites, launching customers to commercial international applications by commercial companies.

It is driven by the idea that technological development and innovation is needed to develop new markets and thus create new business opportunities for the Water Technology sector. In this way The Netherlands acts as the European Water Technology Hub, with its focal point at WaterCampus Leeuwarden, The Netherlands.
