

**Ariel Stern** (CEO and Co-Founder) – A highly experienced Electrical Engineer with a B.Sc. from the Israel Institute of Technology (Technion), Ariel is Ayyeka's Co-Founder and CEO leading the development of Ayyeka's remote water monitoring solutions. After his military service as a Captain in the Israeli Air Force responsible for airborne electric systems, Ariel served as Senior Project Manager at the Israel Ministry of Defense supervising third party defense contractors such as Elbit, EIOp and Rafael. He then co-founded Ayyeka in order to introduce innovative, cyber-secure, easily connected data monitoring solutions into the industrial automation industry. By enabling the setup of affordable plug-and-play smart infrastructure networks, Ayyeka is leading industrial IoT into the future.
