

Aziza Akhmouch is leading the Water Governance Programme of the Organisation for Economic Cooperation and Development (OECD). Her field of expertise covers a wide range of governance topics including multi-level governance, capacity building, stakeholder engagement, river/groundwater governance, water security and integrity. She has developed policy tools to diagnose major governance gaps in the water sector and provide policy guidance to decision-makers at different levels to bridge them. She is the author of several OECD water governance (country and cross-country) reports and working papers in the OECD, Latin America and Mediterranean region.

Aziza Akhmouch created the OECD Water Governance Initiative, a multi-stakeholder network of public, private and not-for-profit actors gathering twice a year in a Policy Forum to foster experience sharing and bench-learning. She has been leading several water governance policy dialogues with selected countries (Brazil, Netherlands, Mexico,) to provide evidence-based assessment and policy recommendations on critical areas and drivers for reform.

Aziza Akhmouch holds a PhD in Geopolitics and a MS in International Business.
