

Carlos Montero Ruano

Chief Technology Officer, Agbar

Civil engineer specialized in hydraulics by the Polytechnic University of Catalonia (UPC), and Master in Water Management by the UPC.

He started his career in the water area in 2002 in CLABSA, the urban drainage managing company in Barcelona, where he reached to be the Head of R&D Service. In 2009 he was recruited as the Technical Director of CETaqua, the water research center of Agbar, steering the research programme mostly funded with public (European) and private funds in competitive tenders.

In 2012 he was appointed CEO of Aqualogy Industrial Solutions, the Agbar branch devoted to industrial water treatment, managing the water treatment activity of the Company for the private sector.

February this year he started his current position as Chief Technology Officer of Agbar (Suez Water Europe), with the aim to increase the technological portfolio of the Company.

He is also member of the Board of CETaqua Andalucia, Associated Editor of JAWER (Journal of Applied Water Engineering and Research) and Chairman of the Water & Energy Committee of the Catalan Society of Civil Engineers.
