

**Martin Shouler**  
**Associate Director**  
**ARUP**

Martin is Leader for Environmental Services Engineering (Public Health Engineering) and has extensive experience in this field. Particular expertise includes a wide range of public health services including water supply, sanitation, sewerage, water conservation and efficiency, water quality, water treatment, wastewater engineering, and infrastructure services.

Martin has been involved in managing and undertaking research to support both the Building Regulations (Part G and H) and the Water Regulations. Currently, he is a member of the expert group advising ODPM (now DCLG) on revision of Part G (Water conservation, sanitation and hygiene) and the British Standards Institution (BSI) committee responsible for water sector standards (B/504).

He is also an advisor to Defra on the sustainable use of water (Market Transformation Programme) directing priorities and research needs.
