

Ravid Levy is the Director of WaterEdge.IL, Israel's national water innovation community. Ravid earned a bachelor's degree from the Hebrew University and a master's degree from Tel Aviv University, specializing in Biology and Environmental Sciences. His career spans over 20 years, during which he held various technological and commercial roles in companies dedicated to providing water and waste treatment solutions. Ravid's expertise lies in innovation and technology transfer, specifically moving advancements from the development stage to practical, commercial applications in the water and waste sectors for both industrial and municipal contexts.
